Mixture of nylon yarns

TWIDE nylon product range, offers a broad number of possibilities of **mélange effects on polyamide 6 flat yarns**.

Spectacular effects can be achieved by **mixing mass dyed and ecru nylon yarns**, it can also combine cationic and anionic yarns and even it can be possible to mix different decitex selection to achieve more accentuate or lighter effects.

Mélange effects and softness

It has been specially designed to provide **mélange effects without compromising quality and comfort**.

TWIDE offers innumerable possibilities for those applications in baselayer sportswear, where the softness and lightness of the fabric are essential.

- A mix of mass dyed and ecru polyamide cationic/anionic yarns
- Flat drowned yarns
